Please do not write in shaded area if you are getting clip art.

This project is for construction of a \$165,000 facility for our middle school and high school soccer programs. There will be a proper entrance foyer to the building where we will display pictures and trophies from our history. The building will house two locker rooms with custom wooden lockers. The locker rooms will also be outfitted with AV equipment for film study. There will also be an 1100 square foot weight room which soccer, track, and baseball will have access to and make use of. There will be a storage garage for soccer equipment as well as exterior bathrooms that will be used during in stadium events and MS and HS baseball games. Finally there will be two coach's offices, one for the boys coaching staff and one for the girls coaching staff. The Mason County Soccer League is spearheading the fundraising effort for the construction of this building. The building will be located at the northern end of our existing school stadium and athletes will be able to walk directly out of the building and onto our game turf.
